Town of South Thomaston Management's Discussion and Analysis Fiscal Year ending December 31, 2018

Management of the Town of South Thomaston offers this management's discussion and analysis report that will provide information that should be used in conjunction with the outside audit report for fiscal year ending December 31, 2018.

Overview of the Financial Statements:

The discussion and analysis report is intended to serve as an introductory to the full audit report. The audit report consists of three components: government-wide financial statements; fund financial statements, and the notes to the financial statements. This report is intended to explain some of these financial statements in a concise and non-financial terminology.

Government-wide Financial Statements:

The government-wide financial statements present the Town's financial position as of a certain date using some common financial reporting tools and using the modified accrual basis of accounting. The governmental activities that are reported include: general government, public safety, public works, health, social services, education and cemetery, parks and recreation activities.

Fund Financial Statements:

A fund is a group of related accounts that have been grouped together to maintain control over activities that are segregated for specific purposes and objectives. These funds include: trust fund accounts.

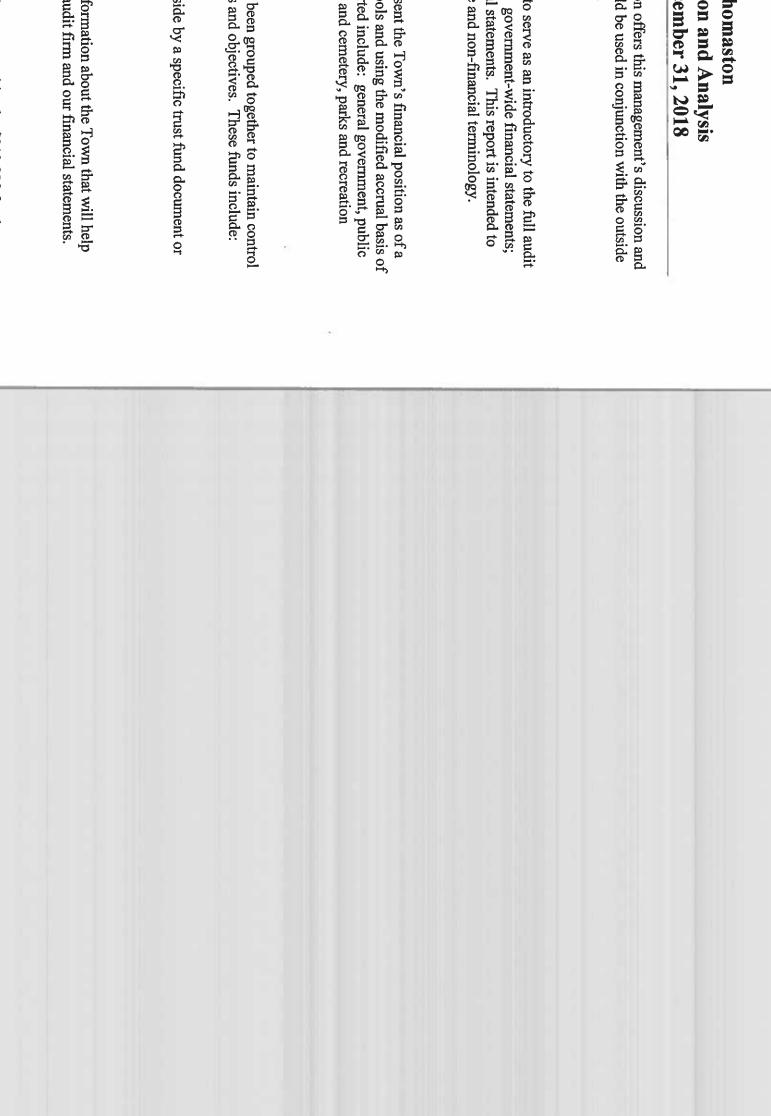

Fiduciary Fund Accounts include funds set aside by a specific trust fund document or by state law.

Notes to the Financial Statements:

The notes provide the reader with additional information about the Town that will help understand the financial data provided by our outside audit firm and our financial statements.

Government Wide Financial Analysis:

The audit report shows that the Town increased our net position by \$213,828 for the year ending December 31, 2018. Ending Net Position is \$2,677,204.00. The Town's outstanding long-term debt of \$245,361.23.

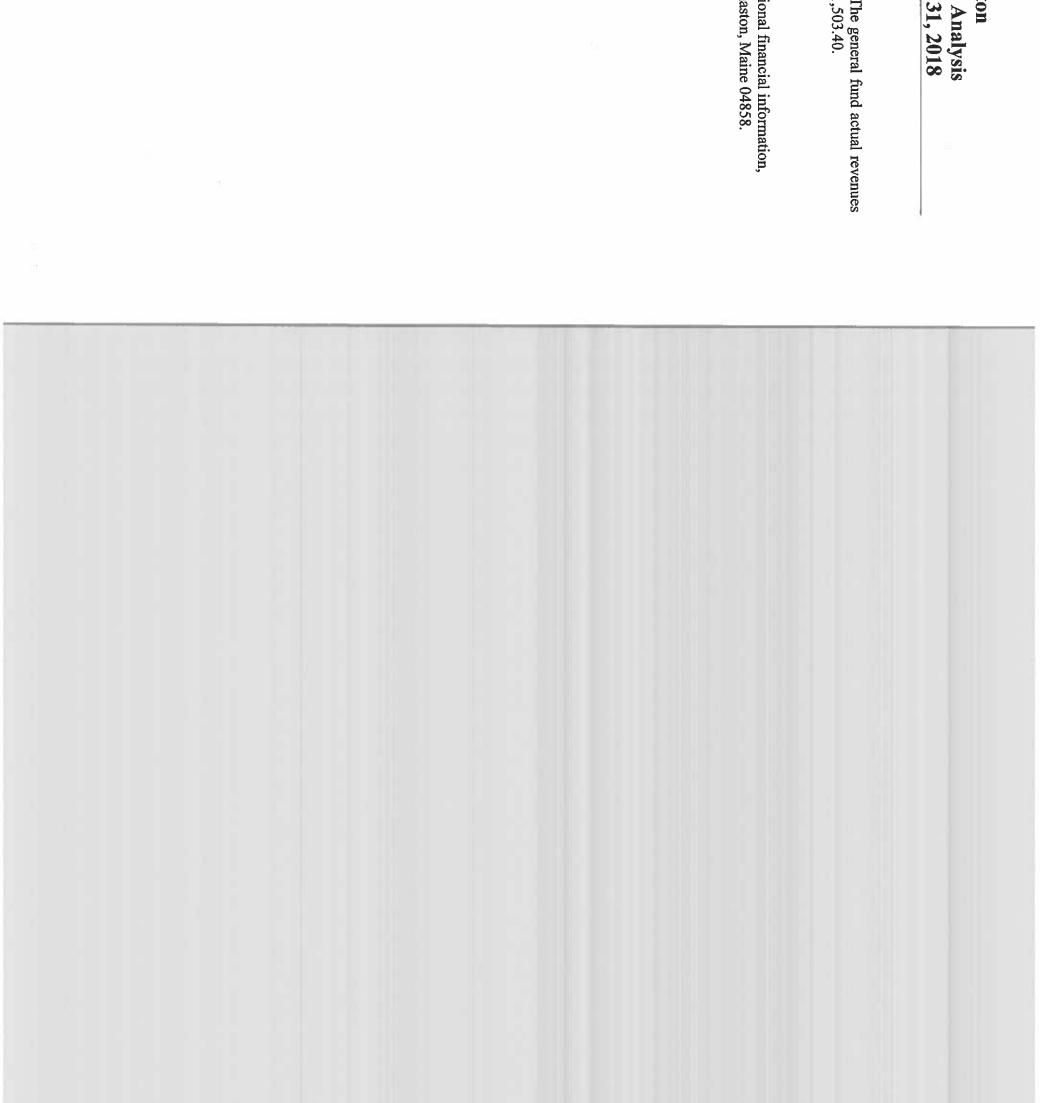

Town of South Thomaston Management's Discussion and Analysis Fiscal Year ending December 31, 2018

All Town departments finished the year under budget. The general fund actual revenues totaled \$ 4,462,217.66, with actual expenditures totaling \$ 4,211,503.40.

Contacting the Town's Management:

If you have any questions about this report or need additional financial information, contact the Town Office at 125 Spruce Head Road, South Thomaston, Maine 04858.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

r reporting mary

The Town of South Thomaston, Maine (the Town) was incorporated in 1848. The Town operates under a selectmen/administrative assistant/town meeting form of government and is incorporated under the laws of the State of Maine.

The accounting policies of the Town conform to U.S. generally accepted accounting principles (GAAP) as applicable to state and local governments. Generally accepted accounting principles for local governments include those principles prescribed by the Governmental Accounting Standards Board (GASB), the American Institutes of Certified Public Accountants in the publication entitled *Audits of State and Local Governmental Units* and the Financial Accounting Standards Board (when applicable).

GASB Statement No. 34, Basic Financial Statements — and Management's Discussion and Analysis — For State and Local Governments, and its amendments, established new financial reporting requirements for governments and caused the Town to restructure much of the information presented in the past. The more significant of the government's accounting policies are described below.

The accompanying financial statements present the government of the Town of South Thomaston, Maine, which is identified based upon the criteria identified in GASB Statement No. 14, The Financial Reporting Entity. The Town engages in a range of municipal services, including administrative services, public safety, health and sanitation, and education. The financial statements include all operations of the Town. Based on criteria set forth in Section 2100 of GASB's Codification of Governmental Accounting and Financial Reporting Standards, the Town of South Thomaston has no component units that are not included in this report.

B. Basis of Presentation

The Town's basic financial statements include both government-wide (reporting the Town as a whole) and fund financial statements (reporting the Town's major funds). Both the government-wide and fund financial statements categorize primary activities as either governmental or business-type.

Government-Wide Financial Statements

The Government-wide financial statements consist of a Statement of Net Position and a Statement of Activities that report information on all of the non-fiduciary activities of the Town as a whole.

The Statement of Net Position reports all financial and capital resources of the Town and reports the difference between assets and liabilities as "net position" not fund balance or equity. The Statement of Activities shows the degree to which the direct expenses of a given function or segment are offset by program revenue and reflects the "net (expense) revenue" of the Town's individual functions before applying general revenues. The Town has elected not to allocate indirect costs among programs. Program revenues include 1) charges to customers for services and 2) grants and contributions that are restricted to meeting operational or capital requirements of a particular function. Taxes and other items not properly included among program revenues are reported as general revenues.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

۳

Basis of Presentation (Continued)

Fund Financial Statements

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the Government-wide financial statements. The focus of governmental and proprietary fund financial statements is on major funds. Major individual governmental funds and major individual proprietary funds are reported as separate columns in the fund financial statements, with non-major funds being aggregated and displayed in a single column. The General Fund is always a major fund.

Because of the basis of accounting and reporting differences, summary reconciliations to the Government-wide financial statements are presented at the end of each applicable fund financial statement.

C. Measurement Focus and Basis of Accounting

overnmental Fund Types

General Fund — The general fund is the general operating fund of the Town. It is used to account for all financial resources except those required to be accounted for in another fund.

Capital Projects Fund – Capital projects funds are used to account for financial resources to be used for the acquisition or construction of major capital facilities.

Special Revenue Fund — Special revenue funds are used to account for the proceeds of specific revenue sources that are legally restricted to expenditures for specified purposes.

Fiduciary Fund Types

Fiduciary funds account for assets held by the Town in a trustee capacity. Non-expendable trust funds are held for investment with the interest only available for cemetery and other specified expenditures.

Basis of accounting refers to when revenues and expenditures are recognized in the accounts and reported in the financial statements. Basis of accounting is a conceptual description of the timing of the accounting measurements made.

The Government-wide financial statements use the economic resources measurement focus and the accrual basis of accounting, in accordance with GASB #34. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the grantor have been met.

As a general rule, the effect of interfund activity has been eliminated from the Government-wide financial statements.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Governmental Fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Under the modified accrual basis concept, revenues are recognized when they become measurable (estimable as to the net amount to be collected) and available as current assets. Revenues are considered to be available when they are collected within the current period or soon enough thereafter to pay liabilities of the current period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting.

When both restricted and unrestricted resources are available, it is the government's policy to use restricted resources first, then unrestricted resources as they are needed.

D. Budgets and Budgetary Accounting

Formal budgetary accounting is employed as a management control for the general fund only. Annual operating budgets are adopted each fiscal year by the registered voters of the Town at their annual Town meeting. Budgets are established in accordance with generally accepted accounting principles. Budgetary control is exercised by department heads, town administration and the board of selectmen. All unencumbered budget appropriations lapse at the end of the year unless specifically designated by the Board of Selectmen or required by law.

.. Assets, Liabilities, Fund Equity, Revenue, Expenditures and Expenses

Cash and Cash Equivalents

Cash and cash equivalents include currency on hand, demand deposits with financial institutions, and other accounts with an original maturity of three months or less when purchased. Investments are recorded at fair market value.

Interfund Receivables and Payables

Short-term advances between funds are accounted for in the appropriate interfund receivable and payable accounts.

Capital Assets and Depreciation

Capital assets, which include property, plant, equipment and infrastructure assets

(roads, bridges, sidewalks and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the Town as assets with an initial, individual cost of more than \$2,500 and an estimated useful life in excess of one year. Such assets are recorded at historical costs or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Major outlays for capital assets and improvements are capitalized as projects are constructed. Property, plant, and equipment are depreciated using the straight-line method over the following estimated useful lives:

Equipment & Venicies	Buildings	Infrastructure	Land & land improvements	Assets
07.70	20-50	10-20	15-50	Years

Net Position and Fund Balances

In the Government-wide financial statements, the difference between the Town's total assets and total liabilities represents net position. Net position displays three components – invested in capital assets, net of related debt; restricted (distinguished between major categories of restrictions); and unrestricted. Unrestricted net position represents the net assets available for future operations.

In the Fund financial statements, governmental funds report reservations of fund balances for amounts that are not available for appropriation or are legally restricted by outside parties for use for a specific purpose. These designations are categorized as follows:

Non-spendable — Funds that are not in spendable form, such as funds that are legally required to be maintained in tact (corpus of a permanent fund).

Restricted - Funds that are restricted for use by an external party, constitutional provision, or enabling legislation.

Assigned – Funds intended to be used for specific purposes set by the Board of Selectmen.

Unassigned - Funds available for any purpose

<u>Deferred Revenue</u>

Deferred revenue arises when potential revenue does not meet both the "measurable" and "available" criteria for recognition in the current period. Deferred revenue arises when resources are received by the Town before the Town has legal claim to them. In subsequent periods, when both revenue recognition criteria are met or when the Town has a legal claim to the resources, the liability for deferred revenue is removed from the balance sheet and revenue is recognized.

Property Taxes

Property taxes for the current year were committed on August 7, 2018, on the assessed value listed as of April 1, 2018, for all real and personal property located in the Town. Payment of taxes was due October 1, 2018, with interest at 7% on all tax bills unpaid as of the due date.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

۲

The Town is permitted by the laws of the State of Maine to levy taxes up to 105% of its net budgeted expenditures for the related fiscal period. The amount raised in excess of 100% is referred to as overlay, and amounted to \$20,101.52 for the year ended December 31, 2018.

Tax liens are placed on real property within twelve months following the tax commitment date if taxes are delinquent. The Town has the authority to foreclose on property eighteen months after the filing of the lien if tax liens and associated costs remain unpaid.

Property taxes levied during the year were recorded as receivables at the time the levy was made. The receivables collected during the year and in the first sixty days following the end of the fiscal year have been recorded as revenues. The remaining receivables have been recorded as deferred revenues.

Risk Management

The Town pays insurance premiums to certain agencies to cover risks that may occur in normal operations. The Town purchases employee fidelity bond coverage. There have been no significant reductions in insurance coverage from the prior year. No settlements of claims have exceeded insurance coverage in the current year.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Estimates are used to determine depreciation expense. Actual results could differ from those estimates.

DEPOSITS AND INVESTMENTS

,

Deposits

Custodial credit risk of deposits is the risk that in the event of a bank failure, the Town's deposits may not be returned to it. GASB Statement No. 40 directs that deposits be disclosed as exposed to custodial credit risk if they are not covered by depository insurance and the deposits are either uncollateralized or collateralized by securities held by the pledging financial institution's trust department but not in the Town's name. At December 31, 2018, cash deposits had a carrying value of \$921,495.89. Of the deposited amounts, \$250,000 per bank was protected by depository insurance, with additional private deposit insurance up to \$1,500,000. Accordingly, the Town was not exposed to custodial credit risk at December 31, 2018.

vestments

The Town has not adopted a formal investment policy, but follows state statutes which authorize the Town to invest in obligations of the U.S. Treasury, agencies and instrumentalities, other states and Canada, provided such securities are rated within the three highest grades by an approved rating service of the State of Maine, corporate stocks and bonds within statutory limits, certificates of deposits with financial institutions, mutual funds, and repurchase agreements. The Town had \$1,256,131.48 invested with Machias Savings Bank at December 31, 2018. The investment was protected by deposit insurance.

8. PENDING LITIGATION

According to Town management, there are no matters that would result in adverse losses, claims, or assessments against the Town through the date of the audit report.

9. SUBSEQUENT EVENTS

Management has made an evaluation of subsequent events to and including the audit report date, which was the date the financial statements were available to be issued, and determined that any subsequent events that would require recognition or disclosure have been considered in the preparation of the financial statements.
